

INTERNSHIP AND INDUSTRIAL VISIT LOG BOOK

Name of Student : DAYAS K R

Internship Title(s) : Python Programming, Machine Learning

1. Daily Log of Activities

Organization Name : Star Innovations PVT LTD, Thrissur

Sl. No.	Date	Hrs	Task Description	Industry Supervisor Signature	Internship Supervisor Signature
1	28/08/2025	6	Introduction to AI & ML: Types of Learning – Supervised, Unsupervised and Reinforcement Learning; ML Workflow; Real-world Applications		
2	28/08/2025	6	Python for Machine Learning: Python Basics Refresher		
3	01/09/2025	6	NumPy Basics: Arrays, Operations and Basic Functions		
4	02/09/2025	6	Pandas Basics: Series, DataFrame and Data Operations		
5	03/09/2025	6	Loading Datasets: Understanding Dataset Structure		
6	13/09/2025	6	Data Preprocessing & Visualization: Data Cleaning		

7	20/9/2025	6	Handling Missing Values: Visualization using Matplotlib/Seaborn		
8	27/9/2025	6	Introduction to Supervised Learning: Features and Label, Train/Test Split, Scikit-learn Basic		
9	04/10/2025	6	Linear Regression: Regression Problems; Model Training		
10	11/10/2025	6	Logistic Regression: Classification Problems; Binary Classification		
11	18/10/2025	6	K-Nearest Neighbors (KNN): Distance Metrics; Classification Using Neighbors		
12	25/10/2025	6	Decision Trees: Tree Models; Entropy and Information Gain		
13	05/02/2026	6	Clustering: K-Means; Unlabeled Data		
14	20/04/2026	6	Dimensionality Reduction: PCA; Feature Reduction		
15	21/04/2026	6	Model Evaluation: Accuracy; Precision; Recall		
16	22/04/2026	6	Project Development – Dataset Selection and Project Planning		
17	23/04/2026	6	Project Development – Data Cleaning & Preprocessing		

18	24/04/2026	6	Project Development – Model Training		
19	25/04/2026	6	Project Development – Model Evaluation & Result Analysis		
20	11/08/2026	6	Final Project Presentation & Applications		

2. Organization Involved

Sl. No.	Name of the Organization	Duration (From-To)	Hours Involved
1	Star Innovations PVT LTD, Thrissur	28/08/2025 - 11/08/2026	120 hrs

3. Industry Visit Record

Date & Place Visited:

Purpose of Visit:

The purpose of the Industrial Visit to UST is to provide students with practical exposure to the IT industry and help them understand the real-world application of concepts learned in the classroom. The visit aims to familiarize students with industry practices, professional work culture, emerging technologies, software development processes, and various career opportunities in the IT sector. It also helps students develop technical, communication, teamwork, problem-solving, and professional skills while bridging the gap between academic learning and industry requirements.

Major Observations:

- **Work Environment:** Observed a professional and technology-driven corporate work environment.
- **IT Infrastructure:** Gained exposure to modern IT infrastructure, software systems, and digital technologies.
- **Software Development:** Understood the basic workflow involved in software development and project execution.
- **Emerging Technologies:** Observed the practical application of technologies such as Artificial Intelligence, Cloud Computing, Data Analytics, and Automation.
- **Industry Practices:** Learned about industry-standard practices, quality processes, teamwork, and project management.

Faculty in-Charge Signature:**4. Final Summary and Certification**

Total Hours Completed (Internship): 120 Hrs

Internship Experience Summary:**a) Key Skills Acquired****Python programming for Machine Learning**

- Data preprocessing, cleaning, and handling
- Data visualization and exploratory data analysis
- Implementation of supervised and unsupervised learning techniques
- Model training, testing, and performance evaluation
- Problem-solving, analytical thinking, and project presentation

b) Tools/Technologies used**Python**

- NumPy
- Pandas
- Matplotlib/Seaborn
- Scikit-learn
- Jupyter Notebook
- Machine Learning datasets

c) Suggestions for future interns

- Gain a strong foundation in Python and basic statistics before starting.
- Practice working with real-world datasets to improve data-handling skills.
- Explore different Machine Learning algorithms through small projects.
- Focus on understanding concepts rather than only implementing code.
- Maintain proper documentation of projects, observations, and results.
- Stay updated with emerging AI and Machine Learning tools and technologies.
